CERTIFICATION

I, Michael Atterbury, of Black Tea Oil, LLC, certify that the following is accurate:

I am familiar with the applicable requirements of 40 CFR 112 and have examined the facility. This plan was prepared in accordance with accepted industry practices and standards and applicable procedures for required inspection and testing.

This facility meets the qualification criteria (under 112.3(g)(1) for Tier I compliance. It does not have an aggregate above ground storage capacity exceeding 10,000 gallons nor any single tank exceeding 5,000 gallons. There has been no single discharge exceeding 1,000 gallons and no two discharges with each exceeding 42 gallons into navigable waters within any twelve month period in the three years prior to the certification date below.

This plan does not deviate from any requirements of 40 CTR 112 as allowed by 112.7(a)(2) and 112.7(d). I understand my obligations relating to the storage of oil products at this facility including the requirements to report any oil discharge to navigable waters or shorelines to the authorities listed in this plan. I also agree to review and amend this plan whenever there are material changes at the facility that affects the potential of fuel discharge, and at least once every 5 years. Reviews and amendments are recorded in the included log.

I certify that I have satisfied the requirement to prepare and implement a plan under 112.3 and all the requirements under 112.6(a). I certify that the information contained in the plan is true.

CERTIFICATION

I, _____, of Black Tea Oil, LLC, certify that the following is accurate:

I am familiar with the applicable requirements of 40 CFR 112 and have examined the facility. This plan was prepared in accordance with accepted industry practices and standards and applicable procedures for required inspection and testing.

This facility meets the qualification criteria (under 112.3(g)(1) for Tier I compliance. It does not have an aggregate above ground storage capacity exceeding 10,000 gallons nor any single tank exceeding 5,000 gallons. There has been no single discharge exceeding 1,000 gallons and no two discharges with each exceeding 42 gallons into navigable waters within any twelve month period in the three years prior to the certification date below.

This plan does not deviate from any requirements of 40 CTR 112 as allowed by 112.7(a)(2) and 112.7(d). I understand my obligations relating to the storage of oil products at this facility including the requirements to report any oil discharge to navigable waters or shorelines to the authorities listed in this plan. I also agree to review and amend this plan whenever there are material changes at the facility that affects the potential of fuel discharge, and at least once every 5 years. Reviews and amendments are recorded in the included log.

I certify that I have satisfied the requirement to prepare and implement a plan under 112.3 and all the requirements under 112.6(a). I certify that the information contained in the plan is true.
